

Office of Transport Safety Investigations

RAIL SAFETY INVESTIGATION

INTERIM FACTUAL STATEMENT

DERAILMENT OF PACIFIC NATIONAL COAL TRAIN NB942

BOGGABRI

28 NOVEMBER 2012

THE OFFICE OF TRANSPORT SAFETY INVESTIGATIONS

The Office of Transport Safety Investigations (OTSI) is an independent NSW agency whose purpose is to improve transport safety through the investigation of accidents and incidents in the rail, bus and ferry industries. OTSI investigations are independent of regulatory, operator or other external entities.

Established on 1 January 2004 by the Transport Administration Act 1988, and confirmed by amending legislation as an independent statutory office on 1 July 2005, OTSI is responsible for determining the causes and contributing factors of accidents and to make recommendations for the implementation of remedial safety action to prevent recurrence. Importantly, however, OTSI does not confine itself to the consideration of just those matters that caused or contributed to a particular accident; it also seeks to identify any transport safety matters which, if left unaddressed, might contribute to other accidents.

OTSI's investigations are conducted under powers conferred by the Rail Safety Act 2008 and the Passenger Transport Act 1990. OTSI investigators normally seek to obtain information cooperatively when conducting an accident investigation. However, where it is necessary to do so, OTSI investigators may exercise statutory powers to interview persons, enter premises and examine and retain physical and documentary evidence.

It is not within OTSI's jurisdiction, nor an object of its investigations, to apportion blame or determine liability. At all times, OTSI's investigation reports strive to reflect a "Just Culture" approach to the investigative process by balancing the presentation of potentially judgemental material in a manner that properly explains what happened, and why, in a fair and unbiased manner.

Once OTSI has completed an investigation, its report is provided to the NSW Minister for Transport for tabling in Parliament. The Minister is required to table the report in both Houses of the NSW Parliament within seven days of receiving it. Following tabling, the report is published on OTSI's website at www.otsi.nsw.gov.au.

OTSI cannot compel any party to implement its recommendations and its investigative responsibilities do not extend to overseeing the implementation of recommendations it makes in its investigation reports. However, OTSI takes a close interest in the extent to which its recommendations have been accepted and acted upon. In addition, a mechanism exists through which OTSI is provided with formal advice by the Independent Transport Safety Regulator (ITSR) in relation to the status of actions taken by those parties to whom its recommendations are directed.

Incident Overview

At 1430 hours on Wednesday 28 November 2012, Pacific National coal train NB942 while travelling over the Coxs Creek Bridge at Boggabri derailed the last six wagons of the train's consist. As a result of the derailment the first five wagons toppled over the bridge and onto the ground below. The last wagon derailed but remained on the bridge.

Following the derailment a small fire broke out in the grass below the bridge, requiring the attendance of the local Rural Fire Service to extinguish it.

There was extensive damage to the Coxs Creek Bridge and to the six derailed wagons.

The OTSI Duty Officer received notification of the collision at approximately 1500 hours on 28 November 2012, and two OTSI investigators travelled to the site and completed a preliminary investigation the following day.

After reviewing the preliminary incident information, the Chief Investigator determined that the derailment warranted formal investigation pursuant to Section 45A of the *Transport Administration Act 1988* and Section 67 of the *Rail Safety Act 2008*.

Terms of Reference

The terms of reference established by the Chief Investigator require OTSI's Investigating Officer to:

- a. identify the factors, both primary and contributory, which caused the derailment;
- b. advise as to whether the derailment might have been anticipated and the effectiveness of any strategies that were in place to manage the related risk/s; and
- c. advise on any matters arising from the investigation that would enhance the safety of rail operations.

Status of the Investigation

OTSI's investigation has commenced. During the course of the investigation, all Directly Involved Parties (DIPs) will be consulted and will be afforded the opportunity to comment on the draft report before it is finalised.

Once completed, OTSI's investigation report will be tabled in both Houses of the NSW Parliament by the Minister for Transport in accordance with Section 74 of the *Rail Safety Act 2008*. When the Report has been tabled, it will be published on OTSI's website and will replace this Interim Factual Statement.
